

```

Config conf = JPF.createConfig(args);
JPF jpf = new JPF(conf);
jpf.run();
ErrorList errors = jpf.getSearchErrors();
if (errors != null)
    fail("JPF found unexpected errors.");
  
```

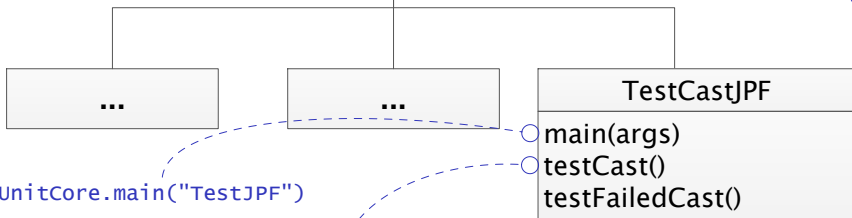

```

t = new TestCast();
if ("testCast".equals(args[0]))
    t.testCast();
...
  
```

```

Object o = "Blah"
String s = (String) o;
  
```

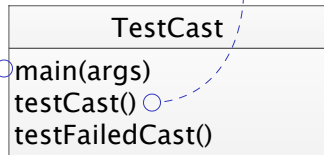

```

JUnitCore.main("TestJPF")
  
```

```

String[] args = { "gov.nasa.jpf.jvm.TestCast", "testCast" };
runJPFNoException(args);
  
```

JUnit test driver

- JPF is embedded using runJPF methods

Raw test program

- No JUnit employed
- Executed under JPF or a normal VM
